## **KETS TECHNOLOGY STANDARDS**

For more information about the KETS Technical Environment click here.

The KETS technology standards found below have been approved by KDE with the input of the Architectural Standards Committee (ASC)

Districts are required by <u>701 KAR 5:110</u> to procure only those technologies that meet KETS standards, if a standard for that category has been established, regardless of source of funds.

Category Name	Standard	Description	Approved Products	Standard Type	Date
